Experience

Freelance Software Developer {Missoula, Montana}

May 2012 - Present

- * Developed biological models in Matlab.
- * Developed an application for scraping image data from Imgur.
- * Updated and developed web applications.
- * Performed data analysis on personal financial systems.
- * Developed applications to test security of personal network.
- * Developed an application for adjusting hash values of a given file.
- * Developed an application for beautifying filenames in an entire folder.
- * Developed an application for organizing singleton files.
- * Participated in CSCI 595 Introduction to Cybersecurity, taught by Sherri Davidoff.

Senior Software Developer for **Hanna-James Enterprises**, **LLC.** July 2014-February 2015 {**Missoula, Montana**}

- * Wrote Terminal-Based Test Automation Software in Python
- * Wrote specification document for GUI-Based Test Automation Software in Python
- * Wrote proof-of-concept prototype for D3-based ToR Network Tracking software in Coffeescript
- * Wrote specification document for GUI-Based SDK Architecture
- * Designed and wrote entire MySQL database for SDK toolkit and implemented a data abstraction layer in Python with distinct connectors for loading the GUI, expanding a specified tool, building a tool for insertion into the database, and setting up the toolchain for execution.

Teacher's Assistant for Programming Languages Spring 2012
Teacher's Assistant for Computer Ethics Fall 2011
Instructor for Computer Modeling Fall 2010 - Spring 2011
{University of Montana-Missoula}

- * Taught freshman and sophomore students advanced features of Microsoft Excel and Access and assisted them during labs.
- * Graded all assignments, papers, and exams. Also, maintained office hours to be available out of class for individual tutoring and fielding questions from students.

Education

University of Montana-Missoula

M.S. Computer Science

May 2014

Emphasis in Machine Learning, Data-Mining, and Simulations

University of Montana-Missoula

B.A. Psychology, minor in Math, Media Arts

May 2010

Technical

Languages (Proficient): LATEX, Python, C#, Matlab, JavaScript, R, Java

Languages (Familiar): Bash, C/C++, Coffeescript, OCaml, Perl, Ruby

Databases: MySQL, SQL Server, Access

Frameworks: AngularJS, Ajax, ASP.NET, Bootstrap, D3, jQuery, Node.js, ØMQ

Tools: Android SDK, Emacs, GIT, Mercurial, VIM, Visual Studio

Networking: Aircrack-ng, Kali Linux, Metasploit Framework, NMAP, Wireshark/tshark

Operating Systems: Debian and Red Hat-based Linux, Mac OSX, Windows

Techniques: Iterative Design, User-Centered Design, Rapid Application Development

Selected Projects

More information for the following and other projects can be found on my graduate portfolio blairgemmer.com and the source code is on GitHub @blairg23

Bak-Tang-Wiesenfeld Model for Displaying Self-Organized Criticality

Otherwise known as the Abelian Sandpile Model, written in Python using the Matplotlib module.

Earthquakes

A Python script to plot earthquakes that have occurred in the world, using the Matplotlib Basemap mod-

Hoot, aka The Wolf Box

A hardware/software solution for broadcasting and recording sounds in adverse climates.

Particle Simulator

A particle physics simulator written in Python using the OpenGL libraries.
